

●●● TRIBU WORLD Manifesto for Impact ●●●

You found your TRIBE

A global meta-community committed to driving positive impact. We believe that transformation begins at the grassroots level, where communities hold the power to enact change. Our mission is to democratize access to digital transformation for the non-profit sector and empower communities to become catalysts for a better world.

Our Commitment to Impact

One-for-One Cross-Subsidy Model

We pledge to support communities through a one-for-one cross-subsidy model. For every TRIBU Patron who pays for access, we will ensure that another member from a marginalized community gains access at no cost. This approach not only levels the playing field but fosters a spirit of solidarity and shared responsibility.

1% TRIBU Tax

We are dedicated to reinvesting in our communities through a 1% TRIBU tax on transactions made within our platform. This fund will be allocated to initiatives that directly support the growth and sustainability of local, national, and international communities focused on social impact. By prioritizing this tax, we can collectively nurture the ecosystems that inspire change.

Support for Emerging Communities

TRIBU commits to supporting local, national, and international communities from the outset—communities that play pivotal roles in combating social injustice, environmental challenges, and economic disparity. We recognize that real change occurs when we uplift those at the front lines, equipping them with the resources and networks necessary to thrive.

Ethical Commitment

Every organization that joins TRIBU commits to an ethical standard of “good and no harm.” We believe that every member of our meta-community has a responsibility to act in ways that foster well-being, inclusivity, and respect for all individuals and the environment. We will uphold values that promote justice, equity, and compassion, ensuring that our collective actions contribute positively to the world.

B Certified IT Corporation Commitment

TRIBU is committed to becoming a B Certified IT Corporation, which reflects our dedication to high social and environmental performance, accountability, and transparency. By pursuing this certification, we aim to align our operations with the highest standards of ethical business practices, ensuring our impact is measured not just by profit but by the positive change we bring to communities and the environment.

ESG Commitment with a Focus on Governance

At TRIBU, we recognize that effective governance is key to enabling transformative change. Our commitment to Environmental, Social, and Governance (ESG) principles underlines our belief that good governance drives accountability and ethical practices. We will establish transparent decision-making processes, promote stakeholder engagement, and uphold the highest standards of integrity. By doing so, we aim to create a sustainable model of community empowerment where governance acts as a catalyst for positive impact, ensuring that our actions align with our values and mission.

Our Vision for the Future

We envision a world where every community has the tools, resources, and support to drive meaningful change. TRIBU is here to ensure that technology, knowledge, and opportunities are accessible to all, enabling communities to harness their potential and transform their environments.

Our Values

Empowerment through Connection

TRIBU is about the power of “together.” We provide tools and support for communities to connect, collaborate, and amplify their impact, recognizing that the strongest solutions come from shared ideas and mutual support.

Access for All

Through a cross-subsidy model, we ensure that economic barriers do not limit access to our platform. TRIBU operates with an inclusive spirit, making resources, education, and opportunities available to all who seek them.

Honoring diversity

We honor diverse cultures, perspectives, and experiences. TRIBU is a global network rooted in respect, where differences are celebrated as strengths that enrich our collective understanding and foster innovative solutions.

Respect for all identities

At TRIBU, we believe that true inclusivity means embracing and celebrating all gender identities and sexual orientations. Together, we're building a community where respect and support for LGBTQ+ individuals are fundamental and where every voice is a vital part of our shared vision.

Transparency and Trust

TRIBU is built on integrity and openness. We communicate with transparency, uphold ethical standards, and strive to earn the trust of our members. Our community is our strongest asset, and trust is its foundation.

Sustainability and Future Generations

We are committed to building a future where our impact on the planet is positive. TRIBU integrates sustainable practices, mindful of our role in creating a legacy that future generations will inherit with pride.

We invite your foundation, association, non-profit, community, education, or research institute to join the TRIBU metacommunity. Together, we can create a ripple effect of positive impact that resonates beyond borders, empowering communities and fostering a culture of innovation and resilience. Stand with us in our commitment to democratize digital transformation, empower the changemakers of tomorrow, and uphold our common ethical commitment for a better future.
